jQuery Mask

Hi everyone!

Someone already try to use [jQuery Mask Plugin](#) on cache?

I'm trying but unsuccessfully.

First I created a new ambient on my own machine to developer in html and all works.

So, I exported the library's js (as jss) to a new Application (stylesheet /js /css) and created too a new Zen Page .cls calling this Application style.

On Zen Page

Parameter APPLICATION = "Multi.Estilo";

XData Contents [XMLNamespace = "<http://www.intersystems.com/zen>"]

```
{
<page xmlns="http://www.intersystems.com/zen" title="">
  <vgroup align="center" cellStyle="padding: 4px;">
    <text id="Data" controlClass="simple-field-data-mask"/>
  </vgroup>
</page>
}
```

On Multi.Estilo

Parameter JSINCLUDES

= "jss/jquery-3.3.1.slim.min.js,jss/popper.min.js,jss/bootstrap.min.js,jss/fancybox-master/dist/jquery.fancybox.min.js,jss/jQuery-Mask-Plugin-master/src/jquery.mask.js,jss/jQuery-Mask-Plugin-master/dist/jquery.mask.js,jss/jQuery-Mask-Plugin-master/dist/jquery.mask.min.js";

Parameter CSSINCLUDES = "jss/bootstrap/bootstrap.min.css,jss/fancybox-master/dist/jquery.fancybox.min.css";

When I execute and try to use, nothing works.

I've alerady tried call some functions on onloadHandler Method...

Someone can help?

Thanks.
