ICYMI: A Discussion on IntegratedML in InterSystems IRIS

You may have seen earlier this week that we launched a brand-new learning podcast called [Data Points](#)! There are three episodes released, one of which was a really interesting discussion with Thomas Dyar — a product specialist here at InterSystems focused on machine learning. Take a listen and reach out if you're interested in exploring more about IntegratedML!

You can check out the other two episodes — one on InterSystems IRIS and one on Kubernetes — by going to <https://datapoints.intersystems.com>. That page also has links to subscribe on Spotify, Apple Podcasts, and more!
