Support for Standards built in? FHIR I know is supported, how about OAGIS, FERPA CEDS, PSD2/SWIFT, NIEM?

Hello,

I was wondering if InterSystems has support for the following standards built into IRIS or Health Connect / Ensemble:

1. *Healthcare FHIR(Fast Healthcare Interoperability Resource) Protocol*
2. *Enterprise Resource Planning / Supply Chain Management GS1 EPCIS (Electronic Product Code Information Services) OAGIS (Open Applications Group Integration Specification)*
3. *Education, Certification, Credentials FERPA CEDS (Common Education Data Standards) Protocol*
4. *Open Banking PSD2 / SWIFT (Payment Services Directive/Society for Worldwide Interbank Financial Telecommunication) Protocol*
5. *Federal, State and Local Government NIEM (National Information Exchange Model) Protocol*

If not, has anybody utilized Iris or Ensemble for these kind of messages?

Thanks,

Oliver
