## InterSystems IRIS ya disponible en instancias EC2 de AWS basadas en ARM Graviton2

AWS ha liberado oficialmente su segunda generación de procesadores [Graviton2](#) basados en ARM y asociados al tipo de instancia Amazon EC2 M6g, que presume de ser [hasta un 40% mejor en precio-rendimiento](#) sobre la actual generación de instancias M5 basadas en Xeon.

Hace pocos meses, Inthis nos llevó a [suportar arquitecturas ARM64](#) por primera vez.

¡Ahora puedes probar [InterSystems IRIS](#) e [InterSystems IRIS for Health](#) sobre instancias Amazon EC2 M6g basadas en Graviton2 accesibles a través del AWS Marketplace!

Si no estás familiarizado con el lanzamiento de una instancia a través del AWS Marketplace, vamos a hacerlo ahora. Lo primero es hacer log-in en tu cuenta AWS, después navega al listado de [InterSystems IRIS](#) del AWS Marketplace y haz clic en 'Continue to Subscribe'

The screenshot shows the AWS Marketplace interface for the InterSystems IRIS (Arm64) Community Edition. The top navigation bar includes 'Categories', 'Delivery Methods', 'Solutions', 'Migration Mapping Assistant', 'Your Saved List', 'Partners', 'Sell in AWS Marketplace', 'Amazon Web Services Home', and 'Help'. The main content area displays the product name, version, and a 'Continue to Subscribe' button, which is highlighted with a red arrow. Below this, there is a 'Save to List' button and a pricing box showing a typical total price of \$0.102/hr. The page also features a 'Product Overview' section with a description of the data platform and a 'Highlights' section listing features like a multi-model database engine.

Click en 'Accept Terms' para subscribirte, espera un minuto, y después 'Continue to Configuration'

## Subscribe to this software

To create a subscription, review the pricing information and accept the terms for this software.

### Terms and Conditions

#### InterSystems Corporation Offer

By subscribing to this software, you agree to the pricing terms and the seller's [End User License Agreement \(EULA\)](#). You also agree and acknowledge that AWS may share information about this transaction (including your payment terms) with the respective seller, reseller or underlying provider, as applicable, in accordance with the [AWS Privacy Notice](#). Your use of AWS services is subject to the [AWS Customer Agreement](#) or other agreement with AWS governing your use of such services.

**Accept Terms**

The following table shows pricing information for the listed software components. You're charged separately for your use of each component.

InterSystems IRIS (Arm64) Community Edition	
EC2 Instance Type	Software/hr
m6g.medium	\$0
m6g.large	\$0
m6g.xlarge	\$0
m6g.2xlarge	\$0

# Launch this software

Review your configuration and choose how you wish to launch the software.

### Configuration Details

Fulfillment Option	64-bit (Arm) Amazon Machine Image (AMI) InterSystems IRIS (Arm64) Community Edition <i>running on a 1.xlarge</i>
Software Version	IRIS 2020.1(Arm64) Community Edition
Region	US East (N. Virginia)

[Usage Instructions](#)

### Choose Action

Launch from Website ▾   Choose this action to launch from this website

### EC2 Instance Type

m6g.large ▾

**Memory:** 8 GiB  
**CPU:** 2 virtual cores  
**Storage:** EBS Only  
**Network Performance:** Up to 10 Gigabit Ethernet

Ve bajando, y selecciona un par de claves válido, o sigue el link para crear uno nuevo si no tienes ya uno. Después selecciona Launch.

## InterSystems IRIS (Arm64) Community Edition

### VPC Settings

\* indicates a default vpc

[Create a VPC in EC2](#)

### Subnet Settings

IPv4 CIDR block: 172.31.32.0/20

[Create a subnet in EC2](#)

(Ensure you are in the selected VPC above)

### Security Group Settings

A security group acts as a firewall that controls the traffic allowed to reach one or more instances. You can create a new security group based on seller-recommended settings or choose one of your existing groups. [Learn more](#)

[Create New Based On Seller Settings](#)

### Key Pair Settings

To ensure that no other person has access to your software, the software installs on an EC2 instance with an EC2 key pair that you created.

[Create a key pair in EC2](#)

(Ensure you are in the region you wish to launch your software)

Ahora ya puedes navegar a tu consola EC2 para acceder a tu nueva instancia.

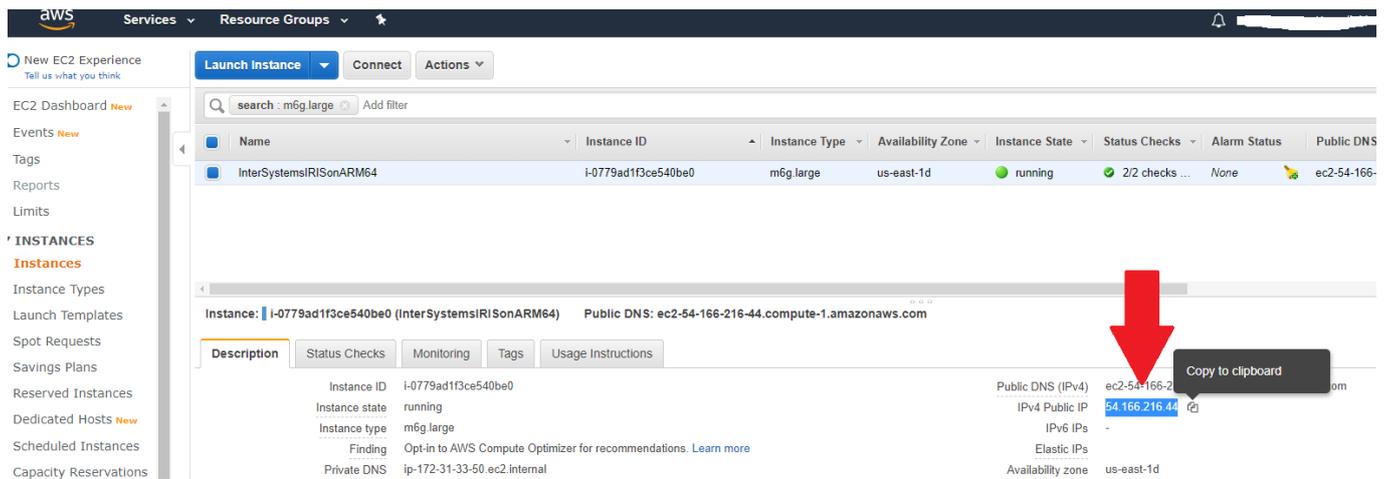

## InterSystems IRIS (Arm64) Community Edition

**Congratulations! An instance of this software is successfully deployed on EC2!**

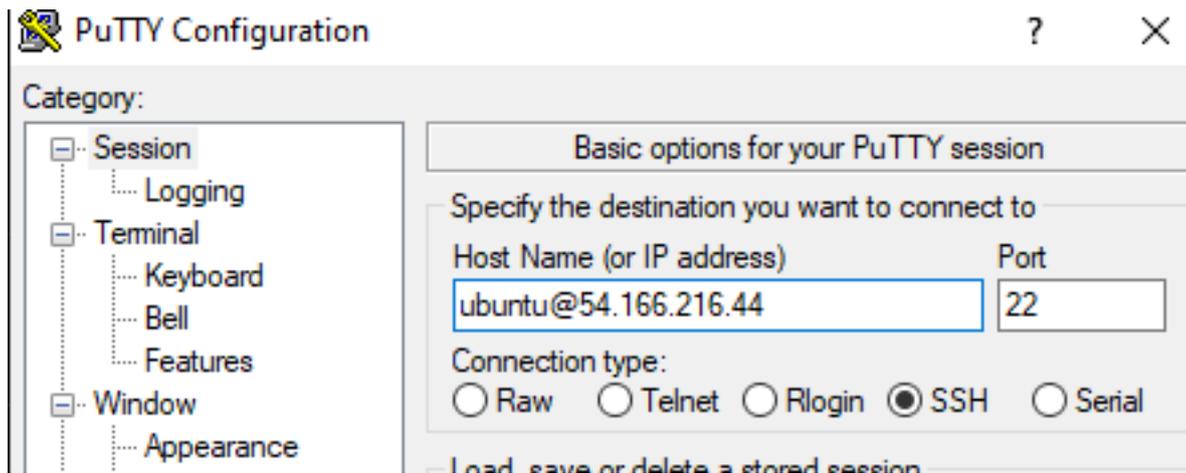

AMI ID: `ami-0a0afdaff1d20e68d` ([View Launch Configuration Details](#))

You can view this instance on [EC2 Console](#). You can also view all instances on [Your Software](#). Software and AWS hourly usage fees apply when the instance is running and will appear on your monthly bill.

Le puedes dar un nombre, acceder a la dirección IP pública, como ves a continuación:

Y entrar vía SSH a la instancia utilizando tu clave privada y el nombre del host (`ubuntu@<Public-IP-Address>`). Aquí estoy usando PuTTY, asegúrate de que apuntas a tu fichero de clave privada (.ppk for PuTTY, under SSH > Auth)

Para otros clientes SSH e información adicional, por favor echa un vistazo a las Instrucciones de Uso copiadas aquí:

### Instrucciones de Uso para IRIS 2020.1(Arm64) Community Edition

Para comenzar:

- Entrar vía SSH a la instancia Ubuntu EC2 siguiendo las instrucciones aquí: <https://docs.aws.amazon.com/AWSEC2/latest/UserGuide/AccessingInstancesLinux.html>

El usuario por defecto es "ubuntu"

- Tomar nota de la información de conexión proporcionada en el mensaje de conexión.

- Comienza por resetear la password de IRIS: "\$iris password"

- Conecta tu IDE - ver: <https://www.intersystems.com/developers/>

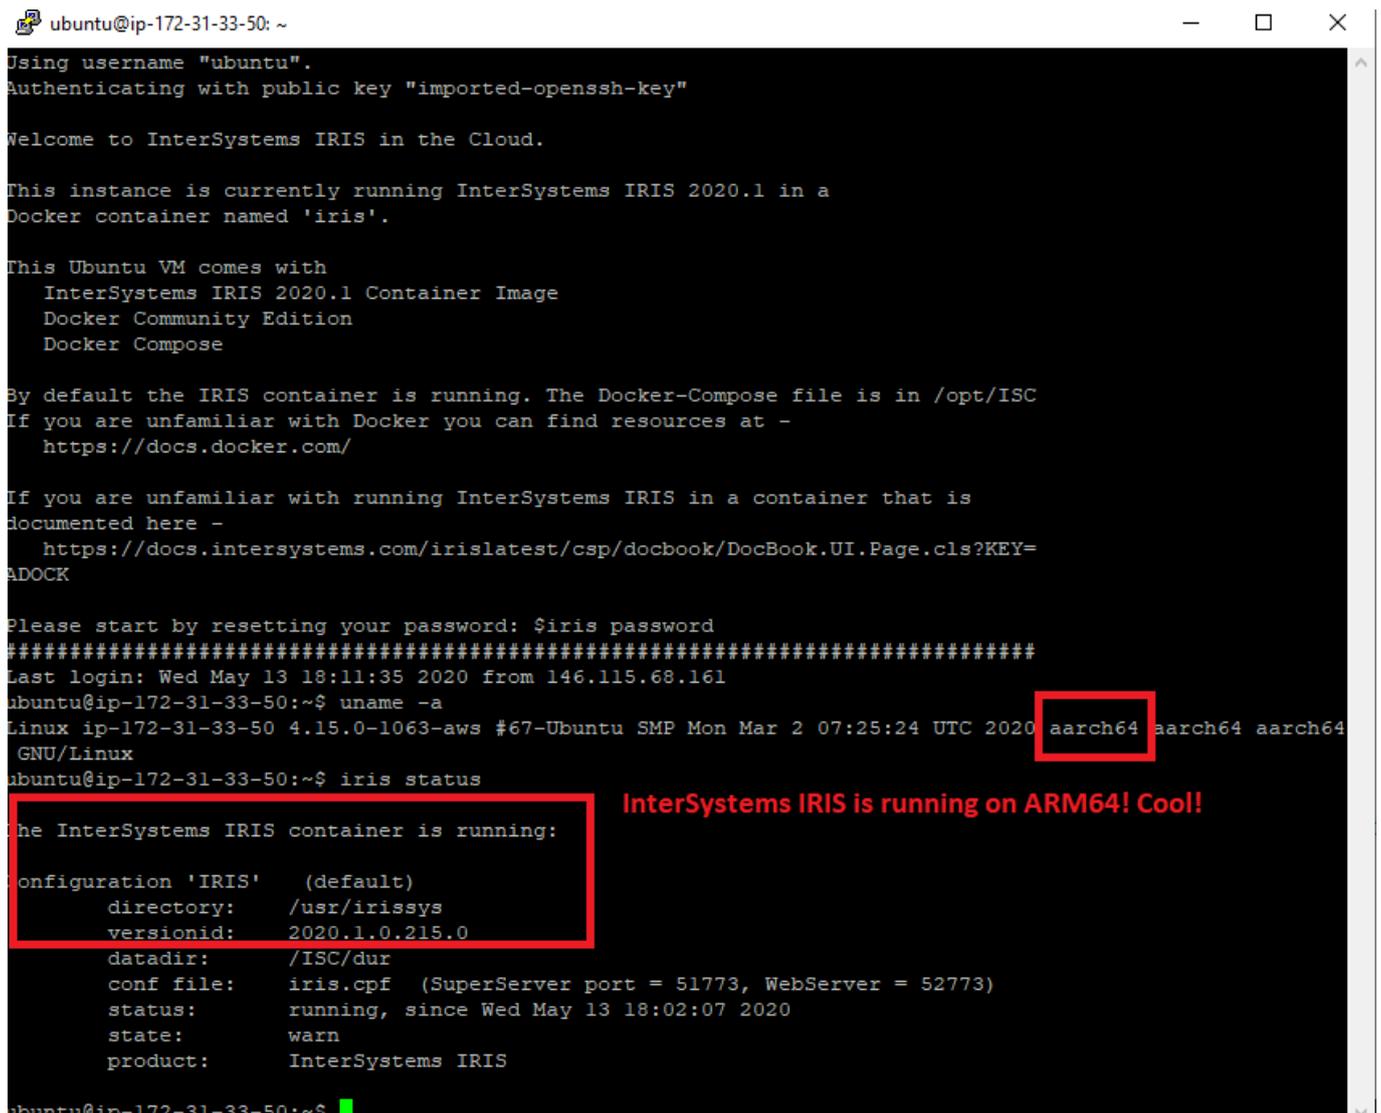

- Aprender más con un Quickstart

- <https://learning.intersystems.com/course/view.php?id=1055&ssoPass=1>

- Entra directamente al terminal de IRIS con: \$docker exec -it iris iris session iris

Recursos adicionales:

- Empezando con InterSystems IRIS - <https://gettingstarted.intersystems.com/>

```

**InterSystems IRIS is running on ARM64! Cool!**

InterSystems se esfuerza en dar a sus clientes la libertad para elegir plataforma. En InterSystems

## InterSystems IRIS ya disponible en instancias EC2 de AWS basadas en ARM Graviton2

Published on InterSystems Developer Community (<https://community.intersystems.com>)

---

estamos entusiasmados por ver las ganancias en rendimiento y el ahorro en coste que los procesadores AWS Graviton2 pueden proporcionar a los usuarios de InterSystems IRIS. Preveemos que estos beneficios combinados deberían llevar a una adopción significativa de plataformas basadas en ARM entre usuarios de IRIS, y ¡nos emociona soportar InterSystems IRIS corriendo sobre instancias AWS Graviton2-based M6g EC2!
